

Danish Pig Genetics P/S
Ladegårdsvej 2
DK-7100 Vejle

Case no. 2018-15-79-02806
Ref. KJEN
Date: 14/09/2018

Business reg. no.: 39785919

Dear Sir / Madam

Decision about approval

The Danish Veterinary and Food Administration has processed the application dated 23 August 2018 from Danish Pig Genetics (DG) for approval as herd/breeding book keepers of purebred breeding pigs and register keepers of hybrid breeding pigs.

Decision

The Danish Veterinary and Food Administration hereby officially informs DG that they have been approved as herd/breeding book and register keepers in accordance with Section 2(2) and (5) of the Executive Order on Purebred Breeding Pigs and Hybrid Breeding Pigs¹.

The Danish Veterinary and Food Administration will enter DG in the Administration's official lists of approved companies as soon as possible.

According to EU Regulation 1012/2016, operators who have been approved in accordance with the directives on breeding are deemed to have been approved in accordance with the Regulation; see Article 65(4) of the Regulation. The breeding programmes of these organisations are deemed to have been approved in accordance with the Regulation; see Article 64(5) of the Regulation. DG is therefore automatically deemed to have been approved, and DG's breeding programmes are automatically deemed to have been approved in accordance with the Regulation with effect from 1 November 2018.

The Danish Veterinary and Food Administration thus considers the application to have been approved in its entirety.

Background

According to information provided, herd/breeding books are kept for the breeds Danish Landrace, Danish Yorkshire and Danish Duroc. A register is also kept for animals cross-bred from these breeds. Copies of the breeding programmes for the mentioned animals were attached to the application for approval.

Yours faithfully
